

Description

Conventional Manual Call Point has been designed to operate on conventional fire detection systems.

The Manual Call Point has an easily resettable element rather than a break glass. The call point is supplied with a backbox for surface mounting. It also features a unique 'Plug and Play' installation concept designed specifically to reduce installation time. The call point utilises a terminal block, where all installation cabling is terminated. The red Manual Call Point is approved to EN54-11 standard.

Specification

Maximum Supply Voltage	34vdc
Switch Rating	2A
Indoor Operating Temperature	-10°C to + 55°C
Outdoor Operating Temperature	-25°C to + 70°C
Humidity	0-93 ±3%
IP Rating	24D (Indoor) , 67 (Outdoor)
