

DEMCO
INDUSTRIES SDN BHD

Description

DEMCO Manual Call Point D-101 is suitable for open or closed circuit system and is professionally designed for use in fire detection systems with central control equipment. Alternative terminals are provided for open or close circuits. When wired for open circuit operation, the circuit closes instantly when the glass is smashed.

DEMCO Manual Call Point D-101 is designed to meet the requirement of BS5839 Part 2 and approved by Australian Standard AS1603 Part 5.

Features

- Double terminal wire connectors for independent input and output connections which facilitate installations when used in looping
- Provision of thread protection plugs which protect the thread of the brass inserts on the base box when conceal fixing is necessary
- Incorporation of the manually operated test push button which permits the front cover to be opened without activating the alarm
